Regulator Comments on OU5 Technical Memorandum 1

**Erich Evered, Director
Environmental Restoration
EG&G Rocky Flats, Inc.**

On February 3, 1992, a meeting was held between EPA, CDH, DOE and EG&G to discuss regulator comments on the Technical Memorandum 1 (Revisions to Final Phase I RFI/RI Work Plan). EG&G was verbally instructed to respond to those concerns. DOE, EG&G and its subcontractor have worked cooperatively on the revisions, resulting in an OU5 work plan which DOE believes fully addresses all concerns and remains technically sound and practical. This was accomplished in twelve business days.

This type of turnaround time on work plan revisions should be the rule, not the exception. This can only occur through open communication and cooperation between all involved with the project, anticipation of the obvious, and a clear understanding of the mutual goals of the project. DOE hopes that field work will begin in an equally expedited manner, as we are now three months behind schedule while the Phase I Characterization Report due date remains fixed.

If you have any questions or comments, please contact Jen Pepe of my staff at extension 2184.

Thos R. Lockhart

Frazer R. Lockhart
Director
Environmental Restoration Division
